Corpus composition: five cohorts, two exact arms

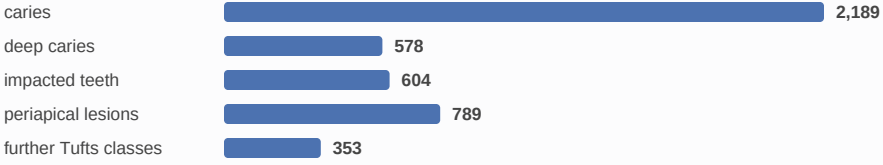
all counts measured from the released trace files (per-cohort 1:1 parity by construction)

cohort	with-tools traces (bar = cohort size)	traces	findings	healthy	avg calls
dentex · pathology		**678**	3,529	0	25.2
dentex · healthy		**27**	-	27	29.9
tufts · periapical overlap		**202**	631	0	18.0
tufts · healthy		**660**	-	660	27.0
tufts · all diseases		**280**	984	0	17.8

totals 1,847 with-tools + 1,847 no-tools · exact parity · 44,350 executed tool calls
5,144 findings (4,513 unique) · 687 healthy images
with-tools arm: 12-13 turns and 18-30 real tool calls per trace

pathology cohorts (findings-bearing) healthy cohorts (negative controls)

unique findings by class



4,513 unique findings; 5,144 annotations total (the 202-image Tufts overlap cohort is contained in the 280-image all-diseases cohort)
