STAGE 1 · GENERATION

provider family A: generators

Expert labels

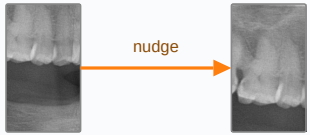

DENTEX · Tufts loaders
FDI conversion at ingest

ground truth per image
FDI 16 · Caries · bbox

Ground-truth-directed LangGraph loop

thought → tool call → observation

repeat every turn

before / after (real episode)

generation pool:

Gemini 3.5 Flash Lite · MiniMax M3 · NVIDIA NIM · local vLLM

tiered display perturbation, independent of the true box:
45% none · 25% small · 30% big - keeps accept-vs-nudge demonstrable

Unverified trace pool

```
thought "The 16 crop, however, missed:
... tooth 16 is not centered"
call nudge_crop(dx=-0.95, dy=-0.53, s=1.10)
obs bbox -> [859, 477, 202, 345]
```

44,350 executed tool calls

2,292 corrective nudges

no training value until verified
